

**Yes, there has been a change. Here is the explanation as to what's going on.**

**The Race Gas program has been extremely successful and seen rapid growth over the past few years. We have had a parent list being managed manually so children's credits would go into the parents account automatically and with the growth of Race Gas managing it has become extremely time-consuming. We have also encountered a lot of flaws in the process that were causing numerous issues. Because of the significant investment of time managing the parent list and the flaws in it we have decided to remove the process. You can still combine Race Gas credits by calling or emailing in, but they will not be merged before issued as they were in the past. So, when your children or child races you can just email us with the rider's name and the email address of the account that you would like it merged into and we would be more than happy to do this or You can also call 18003375437 and they can help you as well.**

Please let us know if you have any other questions or concerns.

We are letting people know of the change as they ask about it, we are working on getting a new templet that doesn't include the parent tab for the organizations.
